

Eduardo Sacahui

AI PRODUCT & PLATFORM ENGINEERING LEADER

Remote · Colombia / Guatemala (AMER) | eduardo.sacahui@gmail.com | linkedin.com/in/eduardosacahui | github.com/BernydotJar

LEADERSHIP PROFILE

AI product and platform engineering leader who turns ambiguous workflows into governed, customer-facing AI systems. Combines product discovery, hands-on architecture, evaluation, secure delivery, operations, and human-centered adoption—connecting AI behavior and platform decisions to measurable business outcomes.

SELECTED AI PRODUCT EVIDENCE

- **Executive AI Assistant Pilot:** 0→1 delivery across web, PWA, browser extension, and API surfaces with approval-gated actions.
- **LA Muni RAG:** public evidence-first Procedure Workflow Advisor MVP with citations, confidence, document checklists, gaps, and feedback controls.
- **AI Recruiting Copilot:** interactive product demo that exposes candidate evidence and preserves recruiter-controlled review.

EXPERIENCE

AI Solution Architect + Technical Product Owner (Hands-on, Principal FDE scope) · Rice AI Center | 2026

- Leading the technical architecture and delivery of an enterprise AI platform for executive decision support, focused on secure LLM systems, governed orchestration, and production-grade AI operations.
- Architected a secure, enterprise-ready AI command platform integrating Google Workspace, backend-governed orchestration, and structured LLM output controls.

AI Software Engineer & Architect — Python Financial Automation · Credito Directo (Argentina) | 2026

- Architected and delivered Python-based financial automation engines for monthly accounting and tax processes, covering IVA, liquidations, accruals, reversals, and IIBB support.
- Designed hybrid execution patterns across API, FTP, Power Automate, and local runtime flows to process high-volume financial datasets reliably under strict monthly close deadlines.

Backend Software Engineer (Python) · Accounting Models / GST Directo | 2025–2026

- Ingeniero de Software Backend (Python) enfocado en automatización contable, responsable del diseño y evolución de motores de procesamiento para liquidaciones, altas e IIBB.
- Implementé pipelines robustos de ingestión y validación de archivos (XLSX/XLS XML), reglas contables, generación de outputs compatibles con Tango, e integración con FTP/SFTP y Power Automate.

Platform Architect · Edwards Lifesciences | 2023–Present

- Remediated mission-critical bots with ABBYY engineers; restored throughput and stability.
- UiPath–Power Platform convergence strategy; optimized license spend & platform fit.

CEO & Principal Python Engineer · LCH (Low Code Human) | 2023–Present

- Led offshore Python team in building backend services using FastAPI and vector databases for RAG applications.
- Published SDKs for React development teams and managed API lifecycle with cost and latency SLOs.

Technical Delivery Manager · UiPath (United States) | 2022–2023

- Managed Orchestrator deployments on AKS/EKS and on-prem using custom Helm charts, ensuring HA, autoscaling, and DR readiness.
- Engineered robust observability stacks (Prometheus/Grafana/ELK) with SLOs, reducing MTTR in heavily regulated healthcare client environments.

Principal Consultant / Pod Lead — RPA · Haceb (via LCH Consulting) | 2022–2024

- Led an RPA pod focused on UiPath and Power Platform (PAC/Power Apps) for SAP, SharePoint, and web portals.
- Defined development standards (exceptions, idempotency, retries, structured logging) and governance (versioning, audit).

Solution Architect (Fixed-term, 6 months) · Fragomen | 2022

- Led discovery sessions to identify high-value automation opportunities in document-heavy legal workflows, such as petition drafting and evidence management.
- Designed a scalable architecture using UiPath and Power Platform to handle sensitive client data, incorporating OCR for document intake and validation.

RPA Team Lead / Senior Developer · Team International | 2020–2022

- Ran RPA office/CoE and consulting practice; backlog and release mgmt (Jira/ClickUp).
- Hands-on with Blue Prism, UiPath, Automation Anywhere, WorkFusion, Power Platform, Python RPA Framework, Rocketbot.

RPA / Power Automate Senior Developer · Roboyo | 2021–2022

- Built/maintained 200+ automations (Cloud/Desktop, SAP HANA).
- Designed CoE playbooks; integrated external APIs & legacy ERPs.

RPA Senior Consultant / Solution Architect · Cognition HQ (formerly Symphony LAM) | 2018–2020

- Cabify Argentina: OCR ABBYY + Blue Prism + WhatsApp APIs for driver onboarding.
- Banco Ciudad (AR): back-office automations with Blue Prism; monitoring and metrics.

RPA Senior Lead Developer / RPA Developer · Onelink BPO — Colombia & Guatemala | 2016–2018

- Avianca: redispatch automation for flight tickets (operational events).
- Claro: front-office helper to surface customer data, AHT reduction.

RPA Analyst / Web Developer · Capgemini BPO | 2014–2016

- International Paper: statement sending robot for delinquent AR.
- Avon APAC/EMLA: SLA (>90d) & attendance automation (~250 users).

EDUCATION

Master of Business Psychology · Franklin University · In progress (expected 2026)

Bachelor of Business Administration · Franklin University · 2024

CREDENTIALS & RECOGNITION

UiPath RPA Solution Architect · Microsoft Certified App Maker · Microsoft Data Analyst Training · Professional Python Developer · Python Data Structures — University of Michigan · Scrum Professional — Platzi · Harvard ManageMentor — Coaching · EF SET English Certificate — C1 Advanced (67/100) · Workato Certificate of Completion · WorkFusion Diploma (SAP) · AWS Architect (Diploma) · n8n Low-Code Diploma · Git Certificate · OOP Diploma · Design Thinking & Entrepreneurship Thinking Diplomas · LevelUp Program Certificate

Winner — UiPath AI Automation Contest · May 2025
